Setting Steps

- Insert AC adapter into back of clock and plug electric cord into wall outlet.
- Press and hold SET button for 5 seconds until <u>white</u> **hour** numbers flash.
- Change **hour** time using ▲ and ▼ buttons.
- Press SET button briefly until <u>red</u> **minute** numbers flash.
- Change **minute** time using ▲ and ▼ buttons. (For most accurate time, set minute to *one minute* <u>past</u> current minute before proceeding to next step.)
- Press SET button when desired minute is as close as possible to zero seconds. Then <u>white</u> **month** numbers will flash.
- Change **month** using ▲ and ▼ buttons. Note: Month 1 is January; Month 12 is December.
- Press SET button briefly until <u>red</u> **day of month** numbers flash.
- Change **day of month** using ▲ and ▼ buttons.
- Press SET button briefly until <u>red</u> **year** numbers flash.
- Change **year** using ▲ and ▼ buttons. Note: "24" is 2024.
- Press and hold SET button for 5 seconds. Clock/Calendar will stop flashing and will save all settings.
- **Date** and **time** will toggle every 5 seconds. Press ▲ to display **date** only; Press ▼ to display **time** only. To display date & time toggle, unplug and replug power cord.
- Built-in battery backup will retain all settings if there is a power failure or Duo is unplugged and moved to a different location.
